

INSTRUCTIONS FOR BUILDING A PIPE-BOMB

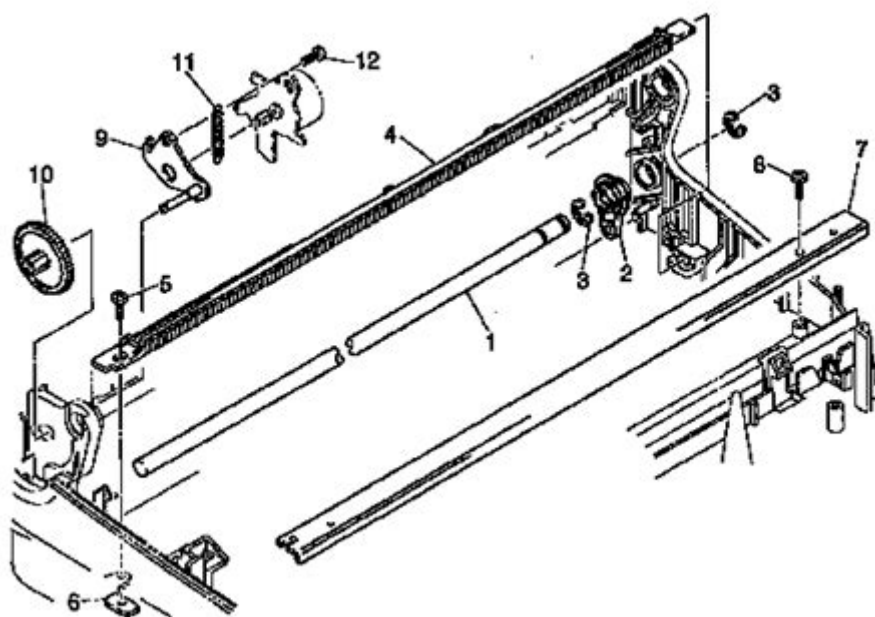

To destroy, incapacitate, or harass,
to blow out windows; damage walls;
and shut down building systems,
such as power. Exit routes

may be disrupted or sealed up —
in your green hand: wave-movements
fundamentally impossible to stop!
All day, the doorless lobbies sigh,

your footsteps on their slabs,
your fingers in the soil, a projection
of the intended architecture
haunted on the high-res blow-up.

Your yawn has plumbed out
the ground, mining its mansions
for one or two greyfields in the sky —
your closed lips are overly dramatic.

This is your night of open eyes,
your face: a-million snapshot pixels
and what's that you're holding —
whose is that high and voiceless laugh?
